Feedback - Week 1 Quiz

Help

You submitted this quiz on **Mon 2 Jun 2014 6:28 PM PDT**. You got a score of **10.00** out of **10.00**.

Question 1			
Which of the following is a principle of analytic graphics?			
Your Answer		Score	Explanation
Make judicious use of color in your scatterplots			
ODon't plot more than two variables at at time			
Show box plots (univariate summaries)			
Show multivariate data	~	1.00	
Only do what your tools allow you to do			
Total		1.00 / 1.00	

Question 2

What is the role of exploratory graphs in data analysis?

Your Answer

Axes, legends, and other details are clean and exactly detailed.

They are used in place of formal modeling.

They are made for formal presentations.

The goal is for personal understanding.	✓ 1.00
Total	1.00 /
	1.00

Question 3

Which of the following is true about the base plotting system?

Your Answer	Score	Explanation
Plots are created and annotated with separate functions	1.00	Functions like 'plot' or 'hist' typically create the plot on the graphics device and functions like 'lines', 'text', or 'points' will annotate or add data to the plot.
Plots are typically created with a single function call		
Margins and spacings are adjusted automatically depending on the type of plot and the data		
The system is most useful for conditioning plots		
Total	1.00 / 1.00	

Question 4

Which of the following is an example of a valid graphics device in R?

Your Answer	Score	Explanation

A socket connection

1.00
1.00 / 1.00

Question 5

Which of the following is an example of a vector graphics device in R?

Your Answer		Score	Explanation
O PNG			
Postscript	~	1.00	
GIF			
) JPEG			
Total		1.00 / 1.00	

Question 6

Bitmapped file formats can be most useful for

Your Answer		Score	Explanation
Plots that may need to be resized			
Plots that are not scaled to a specific resolution			
Plots that require animation or interactivity			
Scatterplots with many many points	~	1.00	
Total		1.00 / 1.00	

Question 7

Which of the following functions is typically used to add elements to a plot in the base graphics system?

	Score	Explanation
~	1.00	
	1.00 / 1.00	
	•	✓ 1.00

Question 8

Which function opens the screen graphics device for the Mac?

Your Answer		Score	Explanation
• quartz()	~	1.00	
opdf()			
opng()			
obitmap()			
Total		1.00 / 1.00	

Question 9

What does the 'pch' option to par() control?

Your Answer		Score	Explanation
• the plotting symbol/character in the base graphics system	~	1.00	
the orientation of the axis labels on the plot			
the line width in the base graphics system			
the size of the plotting symbol in a scatterplot			
Total		1.00 / 1.00	

Question 10

If I want to save a plot to a PDF file, which of the following is a correct way of doing that?

Your Answer	Score	Explanation
Open the screen device with quartz(), construct the plot, and then close the device with dev.off().		
 Construct the plot on the screen device and then copy it to a PDF file with dev.copy2pdf() 	1.00	
Open the PostScript device with postscript(), construct the plot, then close the device with dev.off().		
Construct the plot on the PNG device with png(), then copy it to a PDF with dev.copy2pdf().		
Total	1.00 /	
	1.00
